

# ENGINEERING SOLUTIONS

A&C Engineering has been a leading partner in the supply and development of components and systems for offshore and industry for more than 25 years.

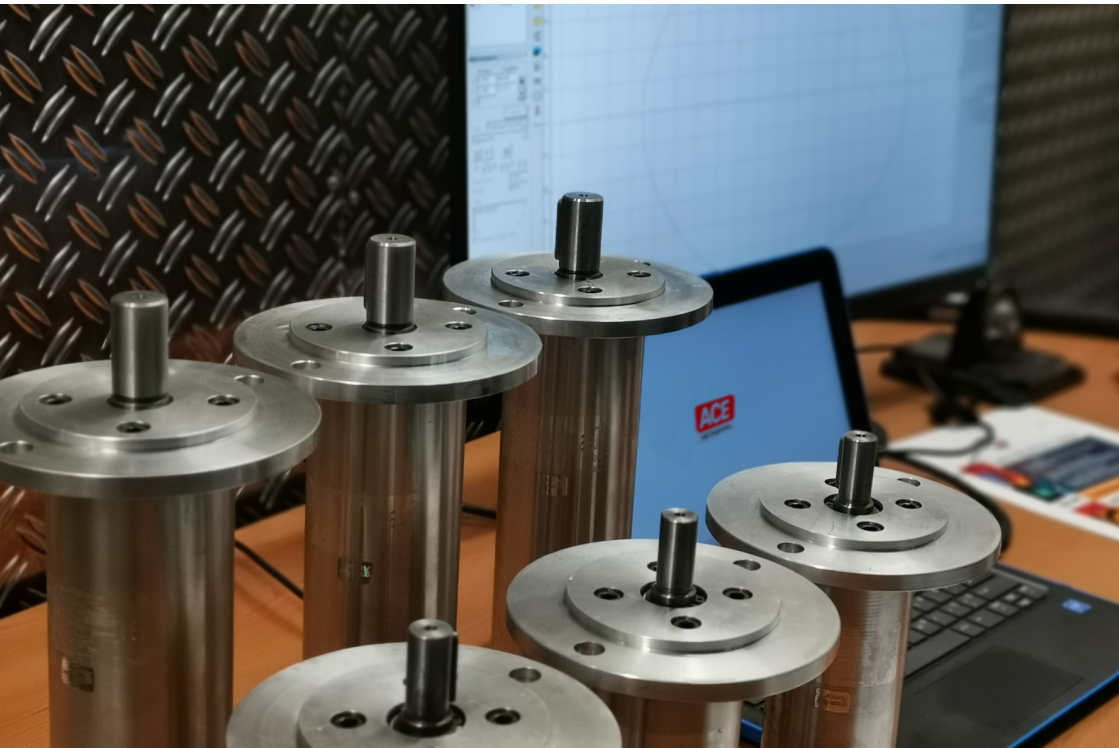

## ABOUT US

Founded in 1987 and based in Stellendam since 2008, centrally located between Maasvlakte, Europoort and the Rotterdam harbor area, A&C Engineering has been active for many years in a wide variety of market segments all over the world.

Besides supplying individual components, A&C Engineering specializes in providing technical solutions that fully meet the needs of its customers. By engineering more efficiently and thinking "out of the box", existing systems can be made more successful and down time is reduced to a minimum.

Our value added services simplify the purchasing process for you as a customer because components can be delivered as a kit or, if desired, kept available for you on call as dedicated stock. A&C Engineering as a company is VCA certified by Det Norske Veritas so that safe execution of work on site is guaranteed.

## Our products

### Hydraulics

- Pumps
- Motors
- Valves

### Pneumatics

- Actuators
- Valves
- Air preparation

### Fluid control

- Solenoid valves
- Diaphragm valves

### Fluid connectors

- Hydraulic Fittings
- Hose assemblies
- Pneumatic fittings
- Quick connectors

### Electromechanical

- Variable Frequency Drives

### Water treatment

- UV systems
- Filtration

## Our services

- System Engineering
- Certification, Repair, Testing
- ParkerStore

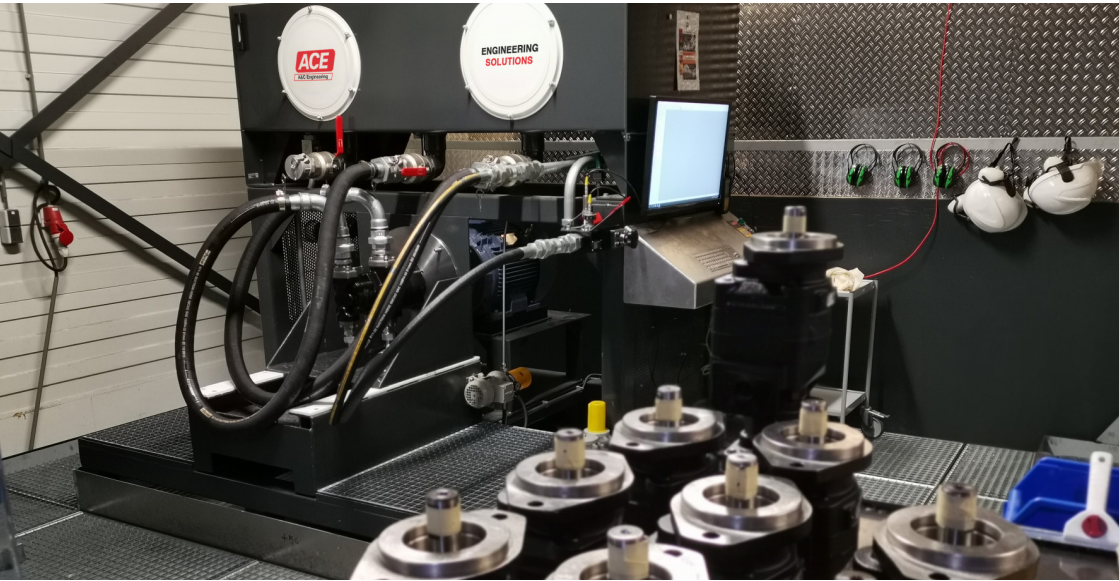

UV SYSTEMS AND FILTRATION

CERTIFIED PRODUCTION AND TESTING  
OF PARKER HOSE ASSEMBLIES
